

SAXTON'S VINTAGE LINENS

STAIN REMOVAL SUGGESTIONS

- 1 Cup Clorox II (color safe)
- 1 Cup Biz (my friend used Oxy Clean)
- 1 Cup Cascade

Fill washing machine with very hot water.

Add all three ingredients to hot water.

Let washer agitate to mix thoroughly.

Let water cool down to room temperature.

Let washer agitate again to mix thoroughly.

Add all materials to be soaked and agitate for a couple of minutes.

Go back every few hours and let it agitate again a couple of minutes,

Just to mix the ingredients to bubbles.

Let soak for 3-4 days or as needed.

If there is a hint of any stain left, while material is wet, lay on grass

With hot sun and mist on concentrated lemon juice.

Hints: On whites, sometimes just the cascade is enough of a bleach.

Also, sometimes, the lemon juice and hot sun will suffice.

If you are soaking only a few small items, only use 1/3 cup of each and less Water.

Soak dirty quilts the same way with the same above three ingredients, but do them in the bathtub, so as not to injure the materials by the washer.
